

We, the 6,619 undersigned, believe that Americans should be allowed to choose more clean, American-made renewable fuel for our cars. The federal government arbitrarily limits the use of ethanol in a gallon of gasoline to just 10 percent, a regulation that is standing in the way of new green jobs, jeopardizing progress toward advanced biofuels, and putting energy security at risk. Allowing the use of up to 15 percent ethanol would enable consumers to choose between fuels that contain no ethanol and any blend up to 15%.
